Any Aston Martin - Any Level of repair!

After many months of negotiation and a massive investment by Aston Workshop, we are pleased to announce the award of 'Category A' crash repairer status from Aston Martin.

This new 'Category A' status means that we are now approved by Aston Martin to carry out any level of repair on any Aston Martin model.

If you require a first class Aston Martin crash repair at very competitive rates, we will be only to pleased to help. To discuss the services we can offer in greater detail or for further advice please contact our workshop manager on 01207 233 525.

Aston Workshop has recently invested in a full state-of-the-art, purpose built Paint & Body centre to offer the highest possible standard of crash repair for all models of Aston Martin.

Situated adjacent to our main workshop, the capabilities we offer include a panel shop, with dedicated Category A quality booths for aluminium and steel fabrication and panel repairs and restoration. With these come a full set of jigs, welders and panel shaping tools and dedicated and knowledgeable team, we can handle any level of repair from a minor accident to full re-build.

Complementing the panel shop is our industry leading, high tech paint facility that enables us to prepare and paint any Aston Martin to factory levels.

Our standards are uncompromising and we use the latest paint technology coupled with old fashioned hand blocking and polishing to achieve the mirror like finish associated with Aston Martin

Achieving this level of repair often means that time and effort are initially required to ensure that the underlying panels are correctly shaped, true and flat before painting. This approach avoids the use of copious amounts of filler often resorted to by others. It is this level of attention to detail that distinguishes an Aston Workshop repair from that of our competitors. Add to this our highly competitive rates and free in-house covered transport facility* and you can see why we believe we offer an un-beatable package.

*Free transport applies from the insurers nominated compound and not from the scene of the accident. Mainland UK only, exceptions apply, please contact us for full details.
