

Leading the way  
in Aston Martin restoration

Aston  
Workshop

Aston Workshop  
is the premier  
independent Aston  
Martin specialist  
in the UK

Aston Workshop was established in the UK in 1988 with the mission to restore Aston Martin cars to the highest specification. Over the last two decades, the company has grown in operation and we have gained an international reputation as one of the world's best facilities for the restoration and modification of this legendary marque. Some of the finest classic Aston Martins in existence are sent all over the world from our state of the art facilities, based at our 3000 sq foot site in the North East of England.

With a long-term investment such as this, you will want to be sure that you are buying from a reliable source that offers the very best in ongoing support and guidance.

## sales

Our business is built on the highest levels of personal service coupled with unparalleled knowledge and expertise, qualities that have earned us the reputation as the world's number one source for all models of classic Aston Martin.

Each car sold by Aston Workshop is thoroughly examined by our dedicated and highly qualified staff, and will only be released to the client once we are happy that the car meets our exacting standards.

Once you take ownership, you can rest assured that we are only ever a phone-call or an email away, should you require any further assistance or advice.

You will have the confidence that comes through buying from such a famous and respected Aston Martin specialist; indeed, many of our clients become long-term friends as well as cherished customers.

Wherever possible, we strongly advise you to visit Aston Workshop to see for yourself our incredible world-class facilities hidden in the beautiful countryside of the North of England. Find out more at [www.aston.co.uk](http://www.aston.co.uk)

## service

Aston Workshop is an 'Aston Martin Authorised' Service Centre. One of only three companies worldwide to be granted this accreditation outside of the dealer network.

Our factory trained service team offer the highest levels of skill and attention to detail when servicing you Aston Martin. You can rest assured that your car is in safe hands. Find out more at [www.astonservicing.com](http://www.astonservicing.com)

The restoration of any Aston Martin can be a lengthy and expensive process. The best and most cost-effective results are achieved by the owner and the restorer working in partnership.

## restoration

All Aston Martins have been hand built. As a consequence, it takes a team of craftsmen, utilising their individual specialist skills, to restore your Aston Martin to its former glory. Indeed, with modern materials and manufacturing processes, our cars are often better finished, perform better, and are much better protected from corrosion and time related deterioration than when they first left the factory.

We go through each stage of the restoration process liaising with the owner, culminating in the final commissioning and road test. Our aim is to deliver to you the most complete, high quality product that you the owner and we at Aston Workshop can be rightfully proud. We have many examples that have passed through our hands, restored to their original, or more often than not, better than original condition. Find out more at [www.astonrestorations.com](http://www.astonrestorations.com)

Aston Workshop have developed a range of kits to upgrade and enhance your Aston Martin – from performance and handling to refinement and comfort.

## enhancements

Many of these upgrades are readily and retrospectively possible to fit, though a few are best undertaken in conjunction with other upgrades in order to preserve the car's safety and ease of use.

For example, a planned engine modification will lead to a significant increase in power and torque; it is therefore only wise to consider further upgrades to the car's cooling, braking and suspension systems.

**Left hand drive conversions:** Over recent years, the demand for left hand drive conversions has risen very substantially, particularly for the DB4, 5 and 6 and increasingly now, the V8 models. We re-manufacture and acquire all items necessary to carry out all of the conversion – be it for DB4, 5 and 6's – chief amongst which are the dashboards. As can be seen, the quality and original appearance is excellent and anyone contemplating a conversion can rest assured that the conversion process is straightforward, taking no more than a few weeks to accomplish and that we are very experienced in carrying them out.

**Electric power steering:** Installing an electric power steering system simply involves the removal of the steering column and its modification with an electric actuator and torque sensor. Today, these systems are being regularly asked for and a replacement modified column can now often be supplied on an exchange basis. Some minor changes to wiring will be required and an adjustment knob

put into the dash to give a degree of driver selected assistance. Alternatively, a fixed degree of assistance can be used. Either way, the installation does not affect the look of the car in anyway.

The enhancements mentioned above are just some of the services we offer. Visit our website to find out about all our engine, braking, suspension, and 'comfort' enhancements. Find out more at [www.astonenhancements.com](http://www.astonenhancements.com)

Aston Workshop has invested in a full state-of-the-art, purpose-built, paint and body centre to complement and enhance the range of facilities that the Aston Workshop is famous for.

## paint & body

Situated adjacent to our main workshop, the capabilities we offer include a panel shop, with dedicated category A quality booths for aluminium and steel fabrication and panel repairs and restoration. Complementing the panel shop we have invested in the latest paint booth and paint preparation facilities, enabling us to prepare and paint cars to the highest standards.

## crash repair & parts

Dealing with the aftermath of any accident is traumatic enough, but we have the skills, people and facilities to ensure that your repaired Aston will be as good as new.

You are welcome to visit our premises in person to purchase parts but as this is not possible for the majority of our customers it is our aim therefore, to make as many Aston Martin related products as possible available to purchase online.

Find out more at [www.astoncrashrepair.co.uk](http://www.astoncrashrepair.co.uk) and [www.astonparts.com](http://www.astonparts.com)

From a simple pen or a luxurious wallet to a fine art photographic print – compliment the ownership of a legend with our range of perfect accessories.

## gifts

Just as with parts, our gifts and accessories are sold globally via our website. Our aim is to offer the widest variety of Aston Martin related gifts anywhere in the world, and we are constantly updating our product list with new and exciting items. With our new enhanced website, we have made it even easier to get the Aston items you desire, delivered to your door, wherever you happen to be. Find out more at [www.astonparts.com](http://www.astonparts.com)

## Aston art

Featuring the world class photography of Tim Wallace, our online gallery includes classic Aston Martin models from the earliest pre-war cars onto the more modern supercars. The website also features our exclusive series of limited edition, signed prints. A fantastic addition to any enthusiasts collection.

*Note: Tim Wallace is responsible for all of the images in this brochure.*
